How do I get my courses enabled on Moodle?

Moodle is a course management system (CMS) designed to help educators create quality online courses. These online courses let you provide documents, graded assignments, quizzes, discussion forums, among other things, to your students with an easy to learn and use interface.

There is no need to do anything on the part of faculty – courses are enabled automatically 2 weeks before the start of each term.

If you do not see your course(s) in Moodle, kindly check first with your department chair if the course has already been assigned to you. Once a course is assigned, it takes an overnight for the course changes to reflect in Moodle. Current course assignments can be viewed here: https://concordia.ab.ca/student-services/registrar/timetables/

For more information on how to use Moodle for your course, please refer to the Moodle how-to guide.
