## How do I connect to eduroam?

Eduroam wireless access is available to all students, faculty, staff, researchers of Concordia University of Edmonton with an active Concordia network account and password.

CUE provides support for the following platforms:

- Android
- Windows 10
- iOS (iPhone/iPad/iPod)
- Mac OS X
- Chromebook

If you are looking to manually setup the wireless profile on another platform you may need the following root certificate:

• Concordia's Wireless Root Certificate - Updated November 2022

Campus visitors requiring basic web access only (HTTP & HTTPS) may connect to the "Concordia Guest" wireless instead.

If your device isn't listed or you are experiencing difficulties logging in or using Eduroam, please contact IT Services
